CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

Except for historical information certain statements included in this presentation are forward-looking statements within the meaning of Canadian securities laws. Such statements may include words such as “Anticipates”, “schedule”, “projects”, “plans”, “targets”, “programs”, “continues”, “estimates”, “could”, “should”, “would” or “will”. Forward-looking statements made in this presentation involve significant risks and uncertainties. These risks and uncertainties include the inherent risks involved in the exploration and development of mineral properties. the uncertainties involved in interpreting drilling results and other geological data. fluctuating metal prices. the possibility of project cost overruns or unanticipated costs and expenses. uncertainties relating to the availability and costs of financing needed in the future. and other factors. The Corporation disclaims any intention or obligation to update forward-looking statements if circumstances or management’s estimates or opinions should change. The reader is cautioned not to place undue reliance on forward-looking statements.

All references to currency made in this presentation are in Canadian dollars unless otherwise stated.

Nicolas Guivarch, M. Sc., P.Geo., acts as a Qualified Person as defined in National Instrument 43-101 and has reviewed and approved the technical information in this presentation.

THE O'BRIEN MINE: RICHEST GOLD MINE BY GRADE IN QUEBEC

HISTORICAL PRODUCTION OF 587,121 OZ FROM 1926 – 1957 (1.2 M TONNES AT 15.25 AU G/T)¹

Why Radisson?

O'Brien is one of the highest-grade undeveloped gold projects in Canada/USA

- Indicated grade of 9.48 g/t is among the highest of undeveloped gold projects not owned by a producer.

Excellent location in one of the best mining camps in the world

- Bousquet-Cadillac Mining Camp - prolific gold camp in the Abitibi (Quebec) which has produced ~25 Moz in 100 years.
- High profile neighbors including Agnico-Eagle (LaRonde, LZ5 and Lapa), IAMGOLD (Westwood), Wesdome (Kiena) and Eldorado (Lamaque)
- Access to power, infrastructure, spare milling capacity, skilled labour and support services.

Exploration upside next to the old O'Brien Mine, historically the richest gold mine in Quebec

- Claims cover more than a 5 km strike length, including over 2.5 km to the east and west of the past producing O'Brien Mine, historically the highest-grade gold mine in Quebec
- Similar geology & structural setting as the old O'Brien mine on the property
- Majority of current resources within a 1 km strike (vs over 5x available strike) and within a vertical depth of 500 m (mines in the camp typically extend to well over 1 km).
- Robust litho-structural model and more than 75 years of historical production and exploration data to guide exploration efforts

Experienced team and strong balance sheet

- Team with the right combination of capital markets and technical experience.
- Cash position of \$11.0 M¹. Funded to complete >130,000 m of drilling through 2021 (including 60,000 m in 2019-20 and an additional 70,000 m in 2021)

Strong institutional and insider ownership

- More than 11% insider ownership and 35% institutional ownership
- 2.5% owned by Rob McEwen (Founder of Goldcorp); 3.2% owned by Marshall Precious Metals (managed by David Garofalo, former CEO of Goldcorp, former CEO of Hudbay)

Company Overview

The O'Brien Gold Project

- High-grade, underground gold project in the Cadillac-Bousquet Mining Camp (Abitibi, Quebec)
- 5,800 ha land package including 5.2 km strike along the Cadillac Break
- Includes >2.5 km strike to the east and west of the past producing O'Brien Mine (historical production of 587 koz @ 15.25 g/t)
- MRE July 2019: 289 koz @ 9.48 g/t (Indicated), 145 koz @ 7.31 g/t (Inferred)
- New litho-structural model (Feb 2019)
- 130,000 m drill program underway (70,000 m planned in 2021)

Experienced Leadership

BOARD OF DIRECTORS

DENIS LACHANCE Eng.
Chairman of the board

35+ years mining experience | Sr positions with Koniambo Nickel, Xstrata (Raglan), Noranda, TVX (Casa Berardi), Agnico Eagle (Goldex).

MARIO BOUCHARD
Director, Advisor

25+ years in the Brokerage industry | CIM Rouyn-Noranda branch director for 26 years | President of Admirio Industriel inc.

RÉJEAN GOURDE, Eng.
Director

40+ years mining industry experience | President & CEO of Reunion Gold | Senior positions with Falconbridge and Cambior

DENIS BOIS
Director

40+ years of mining experience | URSTM Director (1989 to 2017) | Director, Board of Fonds de solidarité FTQ A-T

MICHAEL GENTILE, CFA
Director, Strategic Advisor

15 years capital markets experience | PM with Formula Growth | Founder of the successful FG Alpha Fund | 20+ years as an active/successful mining investor

PIERRE BEAUDOIN
Director

30+ years of mining experience | COO of SilverCrest Metals Inc. | Sr. VP of Capital Projects (2010-2013) & COO (2013-2017) of Detour Gold

JEFF SWINOGA, CPA, MBA
Director

25+ years of mining industry experience | President, CEO & Director of Exploits Discovery Corp. | Previously National Mining and Metals Co-Leader at Ernst & Young Canada | Director, PDAC

MANAGEMENT TEAM

RAHUL PAUL
President and CEO

15 years capital markets /mining industry experience | Previously Director & Precious Metals Analyst at Canaccord Genuity

HUBERT PARENT-BOUCHARD
Chief Financial Officer

12 years accounting/finance/mining experience | Treasurer & Director, CIM Rouyn-Noranda branch

SYLVAIN DOIRE
Environment and Sustainable Development Manager

25 years of experience, 10 years at the Ministry of Environment, Quebec | Former Environment Coordinator for Agnico Eagle (Meadowbank and Méliadine), Falco Resources

NICOLAS GUIVARCH, M.Sc., P.Geo
Manager – Exploration and technical services

10 years of mining/exploration experience | Integral part of the exploration team since August 2019

ADVISORS

KENNETH WILLIAMSON, M.Sc. P.Geo
Senior Advisor, Geology

20 years of mining/exploration experience | Formerly with Premier Gold, Rubicon Minerals, Goldcorp | Developed the current litho-structural model and the ensuing NI 43-101 mineral resource estimate in 2019 at O'Brien

DONALD TRUDEL, P. Geo
Advisor, Exploration and Geology

More than 30 years of mining / exploration experience | Formerly with IamGold, Semafo, Richmond Goldcorp | Joined Radisson in February 2021

Established mining camp in a world renowned gold belt

Cadillac Mining Camp Geological Map

O'Brien Project – Land position expanded 9x following New Alger acquisition

New Alger Acquisition & Partnership with Renforth Resources¹

Transaction Terms

- Acquisition of a 100% interest in New Alger for 12 M RDS shares, C\$0.5 M cash and C\$1.5 M contingent payment.
- Strategic investment of C\$1.8 M by Radisson for a 9.6% stake (24 M shares) in RFR

Benefits to Radisson

- Adds scale and enhances resource upside to increase the O'Brien project's investment appeal.
 - Nine-fold increase in claims to 5,839 ha (from 637 ha)
 - Expands prospective strike along Cadillac break to include over 2.5 km to the east and west of the historic O'Brien Mine (main shaft).
 - Upside from Discovery veins, 250 m south of the Cadillac Break that have been traced along strike by sampling/drilling for 500 m, to a depth of 120 m. Mineralization remains open along strike and at depth.
- Radisson will hold a 9.6% equity interest in Renforth for exposure to other assets in portfolio
 - Company will be well capitalized post transaction to undertake significant work programs at other key assets
- Radisson's cash position is sufficient to both complete the transaction and expand drill program to include newly acquired claims.
- Attractive price paid for New Alger considering the extent of historical work completed.

Benefits to Renforth

- Continued exposure to the combined O'Brien and New Alger properties through 5.7% equity interest in Radisson.
- Estimated transaction value (including contingent payments) of C\$9.5 M² is significant to Renforth
- Transformational deal for Renforth through a major capital infusion at a significant premium
 - Renforth's cash position proforma deal increases almost five-fold to \$4.7 M
 - This does not include \$1.8 M in potential future proceeds from in-the-money warrants and options
- Renforth will be well capitalized to fund significant work programs at its other key assets including Parbec
- Spotlight should help increase capital markets exposure, which will enable Renforth to build on the positive momentum.

Robust O'Brien resource even at a higher cut-off grade

Significant increase in O'Brien mineral resource estimate (July 2019)¹ driven by new litho-structural interpretation

		Indicated resources			Inferred resources

2. NI 43-101 Technical report for the O'Brien project, Abitibi, Québec, InnovExplo, March 20, 2018

O'Brien: Among the highest-grade undeveloped gold projects (Canada/USA) not owned by a producer

Note: Data labels in the following format: Project name (Company ticker/symbol). Source: Public company disclosures

Preliminary metallurgical test work: Potential upside to grade?

- 11.13 g/t Au average grade obtained^{1,2}
 - 53.3% above sample grade
- 59.2% recovery by gravity concentration²
- Total recovery of up to 94%²

1. Sample tested totalled 61 kg and graded 7.26 g/t Au. It consisted of composite core lengths from the main structures of 36E area.
2. See press release of August 26, 2014

Appendix: 2019 Lithostructural Model

Appendix: 2019 Litho-structural Model – Validated by data from the old O'Brien Mine

O'Brien Mine: 3D Isometric view

- Mined 587 koz @ 15.25 g/t (1926 – 1957)
- Mined to a depth of ~1,100 m
- ~90% of production came from only 3 veins

Source: NI 43-101 Technical report for the O'Brien project, Abitibi, Québec, 3D Geo-solution, July 15, 2019

Appendix: 2019 Litho-structural model – Strong compatibility with structures mined at O’Brien

Level plans based on old production data show a strong compatibility between the new model and the geometry of structures previously mined at the O’Brien mine.

Appendix: 2019 litho-structural model - Plan view at different elevations

New model provides an opportunity to better target high-grade zones

- ~63 veins have been modeled, the majority of which have yet to be fully drill tested
- Data suggests very good continuity of mineralization to depth, but there has been limited drilling below 550 m
- Opportunity to better target high-grade zones due to improved structural understanding
