Cautionary Statement Regarding Forward-Looking Information

Certain information contained in this presentation constitutes forward-looking information within the meaning of Canadian securities laws ("forward-looking statements"). All statements in this presentation, other than statements of historical fact, which address events, results, outcomes or developments that Radisson expects to occur are forward-looking statements. More particularly and without restriction, this presentation contains forward-looking statements and information about economic analyses for the O'Brien Gold Project, capital and operating costs, processing and recovery estimates and strategies, future exploration plans, objectives and expectations of Radisson, future mineral resource and mineral reserve estimates and updates and the expected impact of exploration drilling on mineral resource estimates, future feasibility studies and environmental assessments and the timetable for completion and content thereof and statements as to management's expectations with respect to, among other things, the matters and activities contemplated in this presentation. A mineral resource that is classified as "inferred" or "indicated" has a great amount of uncertainty as to its existence and economic and legal feasibility. It cannot be assumed that any or part of an "indicated mineral resource" or "inferred mineral resource" will ever be upgraded to a higher category of mineral resource. Investors are cautioned not to assume that all or any part of mineral deposits in these categories will ever be converted into proven and probable mineral reserves.

All references to currency made in this presentation are in Canadian dollars unless otherwise stated.

For a more detailed list of specific forward-looking statements and information applicable to Radisson, the underlying assumptions and factors that could cause future results or events to differ materially from current expectations expressed or implied by the forward-looking statements, refer to Radisson's Annual Information Form for the year ended December 31, 2023 and other filings made with Canadian securities regulatory authorities and available at www.sedar.com. Other than as specifically required by law, Radisson undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made, or to reflect the occurrence of unanticipated events, whether as a result of new information, future events or results otherwise.

Richard Nieminen, P.Geo., Geological advisor acts as a Qualified Person as defined in National Instrument 43-101 and has reviewed and approved the technical information in this presentation. Mr. Luke Evans P.Eng., ing (ON, QC) of SLR Consulting (Canada) Ltd. is the Qualified Person responsible for the preparation of the Mineral Resource Estimate for the O'Brien Project effective March 2, 2023.

Please see the NI 43-101 "Technical Report on the O'Brien Project, Northwestern Quebec, Canada" effective March 2, 2023 and other filings made with Canadian securities regulatory authorities available at www.sedar.com for further details and assumptions relating to the O'Brien Gold Project.

Radisson and the O'Brien Gold Project

Leadership

Board

Pierre Beaudoin Chairperson
30+ years of mining experience. Formerly COO (2018-2024) of SilverCrest Metals Inc. for Las Chipas Project. Formerly COO (2013-2017) of Detour Gold for Detour Lake Project. Barrick Gold, Lac Minerals Ltd. and Noranda Minerals

Lise Chenard Director
40+ years of mining experience. Previously with Campbell Chibougamau Mines, Lac Minerals and Barrick Gold. Held positions as Chief Geologist at Barrick Gold and Senior Director of Mining Geology & Senior Technical Advisor for IAMGOLD

Michael Gentile Director
20 years capital markets experience. Founding Partner and Senior PM at Bastion asset management. 20+ years as an active/successful mining investor

Peter MacPhail Director
35+ years of mining experience. Formerly COO (2015-2022) of Alamos Gold, Aurico and Northgate Minerals. Led development of Young Davidson mine, La Yaqui Grande mine in Mexico, and initial expansion of Island Gold mine

Jeff Swinoga Director
25+ years of mining experience. President, CEO & Director of Exploits Discovery Corp.. Previously National Mining and Metals Co-Leader at Ernst & Young Canada. Director, PDAC

Cindy Valence Director
20 years of experience in Senior management positions. Recently Executive VP and Chief Sustainability Officer at Sayona Mining Ltd. Women In Mining, Abitibi

Management

Matt Manson President & CEO, Director
30+ years of mining experience. Led Marathon Gold's C\$500M Valentine Gold Project. Led Stornoway Diamond's C\$800M Renard Project. Northern Miner Mining Person of the Year 2017. PDAC Viola Macmillan Award 2015

Hubert Parent-Bouchard CFO
12 years accounting/finance/mining experience. Treasurer & Director, CIM Rouyn-Noranda branch.

Dave Ross VP Exploration
25+ years experience in mineral resource estimation and exploration. Previously, VP Geology and Exploration Calibre and Marathon Gold. Senior Manager Resources Teranga. 15 Years with RPA (now SLR)

Kristina Pillon Manager, IR
14 years capital markets experience focused primarily in resources sector in investor relations, marketing and institutional equity sales. President & CEO of High Tide Consulting Corp.

Located in the World's Most Prolific Gold Belt

- **Located in the Abitibi greenstone belt** hosting +100 million gold ounces between Ontario and Quebec in eastern Canada. One of the **largest and most prolific Neoproterozoic greenstone belts** in the world
- **O'Brien** is located in the **25 Moz Cadillac-Bousquet Camp** on the **Larder-Lake-Cadillac Break**
- Surrounded by current and former **world-class gold deposits**

Recent Deep Drill Results: Drill Holes Published to Date

- OB-24-324 is **170 metres below current Mineral Resources** at "Trend #1"
 - On September 24, 2024: OB-24-324 hit **27.61 g/t Au over 6.0 metres**, including **102.0 g/t Au over 1.0 metres** at **1,100 metres depth**
- OB-24-337 is the **deepest ever hole drilled** at the Project and the **first below the historic mine workings**
 - On December 16, 2024: OB-24-337 hit **31.24 g/t Au over 8.0 metres**, including **242.0 g/t Au over 1.0 metre** at **1,500 metres depth**
- Three new wedges completed from OB-24-337 (April 2, 2025):
 - OB-24-337W3 intersected **29.93 g/t Au over 2.2 metres**, including **53.50 g/t Au over 1.2 metres**
 - OB-24-337W1 intersected **4.44 g/t Au over 6.4 metres**, including **18.65 g/t Au over 1.2 metres**
 - OB-24-337W2 intersected **9.62 g/t Au over 1.4 metres**

May 21, 2025: Coarse Visible Gold in Published and Pending Drill Holes

- As of May 2025, **27 pilot holes and wedges** had been completed beneath the historic O'Brien mine and the new Mineral Resources at East O'Brien of which **14** have been published.
- Results from **13** holes are pending.
- Coarse visible gold** has been logged in **19** of the **27** holes, including **all 8 holes** beneath the principal mining stope at the historic mine.
- Radisson believes the **exploration potential** of the Project is between **3 and 4 million ounces** should the current density of gold mineralization, in ounces per vertical metre, continue to a nominal exploration horizon of 2,000 metres depth.

Visible Gold

1. Technical report on the O'Brien project, Northwestern Québec, Report for NI 43-101, SLR Consulting (Canada) Ltd., March 2, 2023. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, socio-political, marketing, or other relevant issues including risks set forth in filings made with Canadian securities regulatory authorities and available at www.sedar.com.

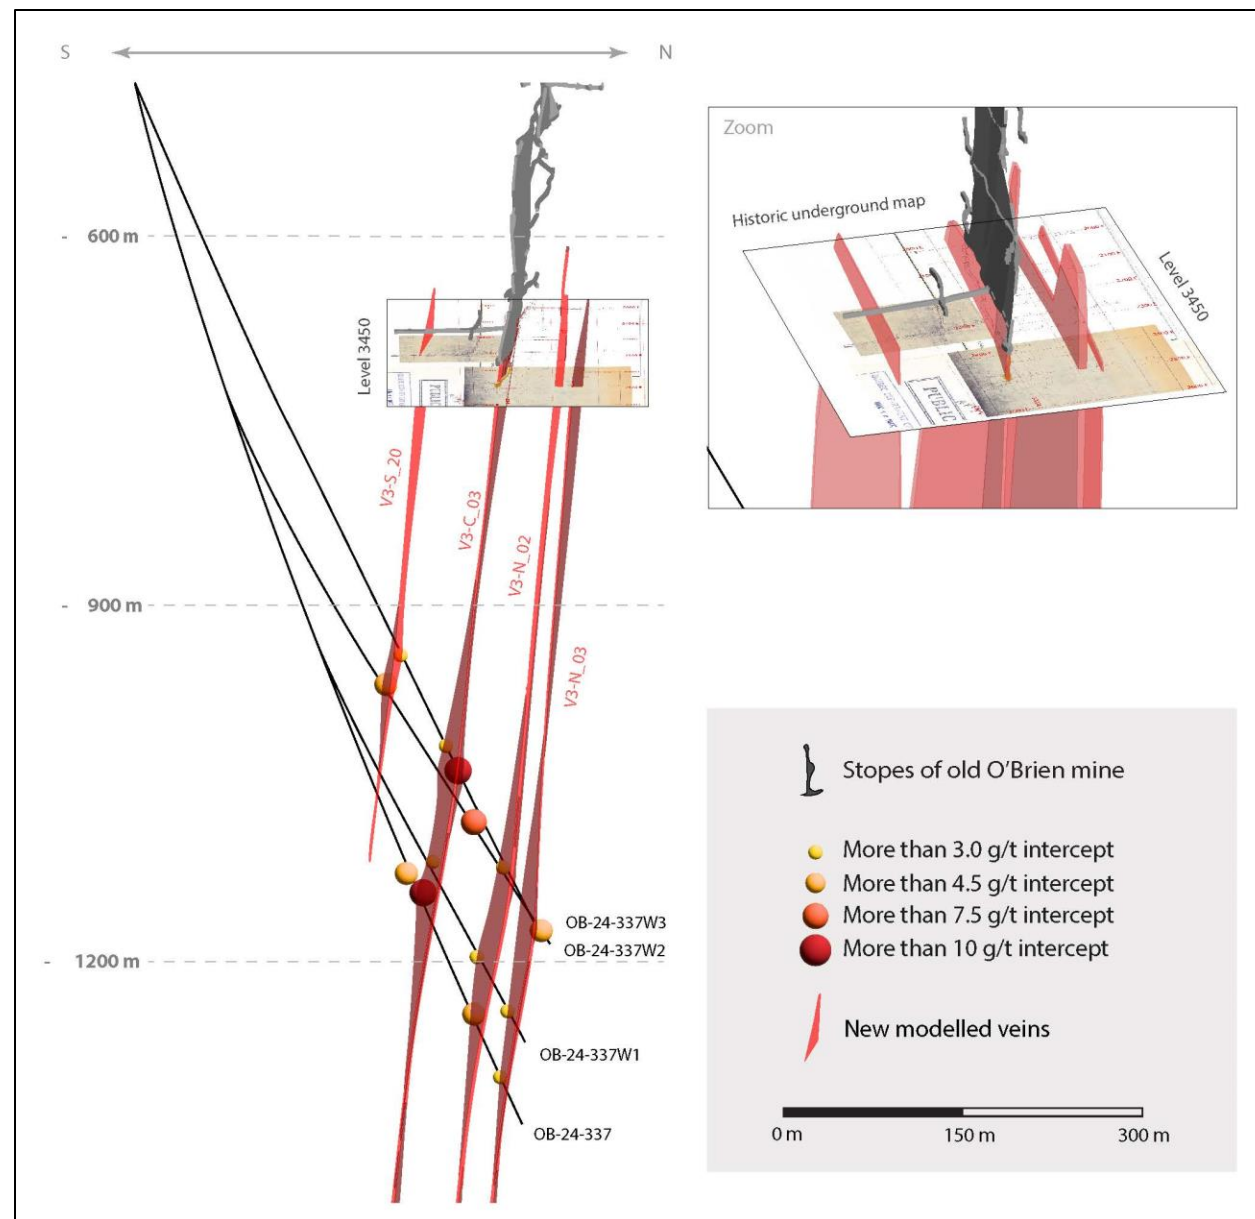

Deep Drilling and Continuity

- The recent deep drilling is also demonstrating **continuity of grade and mineralization** to depth
- This was predicted by the **steeply plunging ore-shoots** of the historic O'Brien mine
- Continuity is being demonstrated over large distances: the latest drilling is **170 metres below** the current MRE at **Trend #1** and **500 metres below** the level of the **historic mine**

Modelling Multiple New Veins to Base of Historic Mine

- April 2, 2025: three new wedges completed and published from **OB-337-24**
- All four holes intersect mineralization and resolve up to four new veins
- Main central vein connects to principal mining stope at the historic mine and is resolved by all four holes. It includes:
 - OB-24-337 **31.24 g/t Au over 8.0 metres**, including **242.0 g/t Au over 1.0 metre**, and
 - OB-24-337W3 **29.93 g/t Au over 2.2 metres**, including **53.50 g/t Au over 1.2 metres**
- Clear continuity between the drill holes and upwards towards mineralization documented at the **base of former mine**
- Results are pending for **four additional wedges** that have been drilled, all of which show vein mineralization and visible gold consistent with the developing model

December 9, 2024: 1.35 kg/t Au at Re-Discovered Jewellery Box

- **OB-24-347: 1,345 g/t Au over 1 metre** (within 643.1 g/t over 2 metres)
- Re-Discovery of Famous O'Brien **"Jewelry Box"**
- Believed to have been the source of O'Brien's famous **museum quality** VG specimens
- Mined **between 250-750 metres** depth. **Lost above 250 metres**
- Now, **Re-discovered**

Gold Mineralization at O'Brien

- **Quartz-sulphide veins** with **coarse VG**
- Pattern of **very high-grade, narrow intercepts** within **broader altered and mineralized envelopes**
 - **OB-24-320** with **24.74 g/t Au over 6.0 metres**, including 137.0 g/t Au over 1.0 metre (Aug. 14, 2024)
 - **OB-24-324** with **27.60 g/t Au over 6.0 metres**, including 102.0 g/t Au over 1.0 metre (Sept. 24, 2024)
 - **OB-24-332** with **16.21 g/t Au over 5.4 metres**, including 32.25 g/t Au over 2.4 metres (Oct. 30, 2024)
- High strain, with **biotite alteration** and **pyrite/arsenopyrite** association
- Agnico Eagle's **Lapa Mine** processed at the **LaRonde Mill** 2008-18 is an **analog for mineralology and metallurgy**

Visible gold encountered in holes OB-24-316-324. See August 14, 2024 and September 24, 2024 press releases

February 3, 2025: Metallurgical Study and Doyon Milling Assessment

- Sept. 9, 2024: **MOU with IAMGOLD** to facilitate **technical assessment** of viability of processing **O'Brien mined material at Doyon mill**
- Doyon is part of the **Doyon-Westwood mining complex** with capacity of **c.3,000 tpd** (Westwood c.1,000tpd)
- Feb. 3, 2025: First comprehensive **Metallurgical Study** published at O'Brien
- **86% to 96%** recoveries based on **several flow sheet options**, all of which are compatible with Doyon at **minimal or modest additional capital**

Flow Sheet Results:

- **86%** with simple Gravity-Leach
- **90%** with Gravity-Flotation-Regrind-Leach
- **94% to 96%** with Gravity-Flotation-Concentrate Sale *(after consideration for payability factors of 90% to 95% respectively)*
- Average arsenic values of **0.4%** to **0.5%** in whole rock and **4.6%** in flotation concentrate, consistent with precedent projects in Québec's Abitibi and offtake threshold limits for concentrates of high-grade gold projects

Regular Drilling News-Flow

- Moving to **4 drill rigs** onsite
- **22,000 metres** in **2025 Program** expanded by **additional 30-40,000 metres**
- **Fully-funded**
- Targeting **deep drilling below high-grade trends** and **Jewellery Box to surface**

Thinking Ahead to Development

- **PEA** for an **O'Brien Mine** based on:
 - Underground mining only
 - Off-site processing
 - Minimal surface facilities, no mill, no TMF
 - 2023 43-101 MRE for mine scheduling
 - Ausenco, Norda-Stelo (InnovExplo), BBA
- Ongoing **environmental studies, permitting** timelines, **community engagement**

2023 O'Brien Mineral Resource Estimate

Cut-off Grade		Indicated Mineral Resources		
	O'Brien Deposit	Tonnage	Grade	Metal
	Resource date	(t)	(g/t Au)	(oz Au)
4.5 g/t Au	July 2019	1,115,000	8.85	318,000
	March 2023	1,517,000	10.26	501,000
	Increase	+402,000	+1.41	+183,000
		+36%	+16%	+58%

3.0 g/t Au	July 2019	1,906,000	6.67	409,000
	March 2023	2,118,000	8.46	576,000
	Increase	+212,000	+1.79	+167,000
		+11%	+27%	+41%

Inferred Mineral Resources		
Tonnage	Grade	Metal
(t)	(g/t Au)	(oz Au)
777,000	6.73	168,000
1,601,000	8.66	446,000
+839,000	+1.91	+281,000
+108%	+28%	+167%

1,500,000	5.29	255,000
3,668,000	5.79	683,000
+2,168,000	+0.51	+428,000
+144%	+10%	+168%

Notes to the Mineral Resources

1. CIM (2014) definitions were followed for Mineral Resources.
2. Mineral Resources are reported above a cut-off grade of 4.5 g/t Au based on a C\$230/t operating cost.
3. Mineral Resources are estimated using a long-term gold price of US\$1,600/oz Au, a US\$/C\$ exchange rate of 1:1.25, and a metallurgical recovery of 85%.
4. Wireframes were modelled at a minimum width of 1.2 m.
5. Bulk density varies by deposit and lithology and ranges from 2.00 t/m³ to 2.82 t/m³.
6. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, socio-political, marketing, or other relevant issues including risks set forth in Radisson's filings made with Canadian securities regulatory authorities and available at www.sedar.com.
7. Numbers may not add due to rounding.

Notes on Historical Disclosure of Mineral Resources at the O'Brien Gold Project
